STUDENT NUMBER: 230599265

USERS STORIES

Purpose: This document records the user stories for Admin, Rider/Passenger, and Driver roles.

Rider / Passenger

ID	User Story	Tasks users should be able to do
US01	As a rider, I want to create an account so that I can access the carpooling services and book rides.	• The rider can complete the required registration fields. • The account is created when the submitted details are valid. • The system displays confirmation or explains any registration errors.
US02	As a rider, I want to securely log into my account so that I can view and manage my bookings.	• The rider can enter their login details. • Valid details open the rider's account. • Invalid details do not grant access and produce an error message.
US03	As a rider, I want to search for available rides based on my pickup location and destination so that I can find a suitable trip.	• The rider can enter a pickup location and destination. • The system displays rides matching the search where available. • The system explains when no matching rides are found.
US04	As a rider, I want to view ride details, including the driver, departure time, available seats, and destination so that I can decide whether the ride meets my needs.	• The rider can open a ride's details. • The details show the available driver, departure time, destination, and remaining seats. • The information corresponds to the selected ride.
US05	As a rider, I want to request to join a carpool so that I can travel with others who are going to the same destination.	• The rider can submit a request for a ride with available seats. • The system records the request against the selected ride. • The rider can see whether the request is pending or has been decided.
US06	As a rider, I want to receive confirmation after booking a ride so that I know my seat has been successfully reserved.	• A successful booking or approved request produces a confirmation. • The confirmation identifies the relevant ride and booking status. • The booking appears in the rider's bookings.
US07	As a rider, I want to view my current and upcoming bookings so that I can keep track of my scheduled trips.	• The rider can open a list of their bookings. • Upcoming and current bookings display key trip details. • The list shows each booking's current status.
US08	As a rider, I want to cancel a booking before the trip begins so that another passenger can use the available seat if my plans change.	• The rider can cancel an eligible booking before the trip begins. • The system updates the booking status after cancellation. • The seat availability is updated where the system supports this.
US09	As a rider, I want to update my personal information so that my account details remain accurate and up to date.	• The rider can edit permitted personal information. • The system validates the submitted details. • Valid changes are saved and visible on the profile.
US10	As a rider, I want to view verified driver profiles before booking a ride so that I feel safe and confident when travelling.	• The rider can open the driver's profile from a ride listing. • The profile displays available driver information and verification status. • The verification status is clearly distinguished from unverified status.
US11	As a rider, I want to save my frequently used pickup and destination locations so that I can book rides more quickly in the future.	• The rider can save a location with a recognisable label. • Saved locations can be selected during ride search. • The rider can update or remove a saved location.
US12	As a rider, I want to see the number of available seats before booking a ride so that I can choose a trip that still has space available.	• The ride listing or details display the number of available seats. • The displayed number updates when booking availability changes. • A rider cannot request a seat when no seats are available.
US13	As a rider, I want to receive updates if a ride is delayed, cancelled, or changed so that I can adjust my travel plans accordingly.	• The rider receives or can view an update when a booked ride changes. • The update identifies the ride and explains the change. • The updated ride details are available to the rider.
US14	As a rider, I want to view the driver's contact details after my booking is confirmed so that I can communicate if necessary before the trip.	• Contact details are available for the relevant driver after booking confirmation. • The details are linked to the correct ride. • Contact details are not shown before the required booking status is reached.
US15	As a rider, I want to leave feedback about my carpool experience so that I can help improve the quality of the service for future users.	• The rider can submit feedback for an eligible completed ride. • The system records the feedback against the relevant ride or driver. • The system confirms submission or explains why it could not be submitted.

Driver

ID	User Story	Tasks users should be able to do
US16	As a new user, I want to create an account so that I can access RideConnect's features.	• The user can complete the required registration fields. • A valid submission creates an account. • The system confirms registration or displays validation errors.
US17	As a registered user, I want to log in to my account so that I can securely access my RideConnect profile.	• The user can enter their login details. • Valid details open the account. • Invalid details do not grant access and produce an error message.
US18	As a driver, I want to view my dashboard so that I can manage my rides and booking requests.	• The driver can open their dashboard after logging in. • The dashboard displays the driver's relevant rides and booking requests. • The driver can navigate to the related management pages.
US19	As a driver, I want to create and update my profile so that passengers can view relevant information about me.	• The driver can create a profile and edit permitted fields. • The system validates submitted information. • Valid changes are saved and shown on the profile.
US20	As a driver, I want to create a ride listing so that passengers can find and request to join my trip.	• The driver can start creating a ride listing. • A listing is published only when required information is valid and complete. • The published listing can be found by riders when it is available.
US21	As a driver, I want to enter my ride details so that passengers can understand the arrangements for my trip.	• The driver can enter the required trip details, such as date, time, and available seats. • The system validates required fields. • Saved details are displayed correctly on the ride listing.
US22	As a driver, I want to enter my pickup and destination locations so that passengers can find and join my ride.	• The driver can specify pickup and destination locations. • Both locations are saved with the ride. • The locations are visible to riders viewing the listing.
US23	As a driver, I want to provide my vehicle information so that passengers know which vehicle to expect for the trip.	• The driver can enter the required vehicle information. • The system validates required fields. • The saved vehicle details are displayed to riders where appropriate.
US24	As a driver, I want to review my ride information before publishing it so that I can check that the details are accurate.	• The driver can preview the ride details before publishing. • The preview includes the information entered for the listing. • The driver can return to edit the details before confirming publication.
US25	As a driver, I want to view my booking requests so that I can manage passengers who want to join my ride.	• The driver can open requests for their own rides. • Each request displays available passenger and booking information. • The status of each request is visible.
US26	As a driver, I want to view relevant passenger details so that I can review booking requests before making a decision.	• The driver can open details for a passenger who requested to join their ride. • Only information relevant and permitted for the booking is displayed. • The details correspond to the selected request.
US27	As a driver, I want to accept or reject booking requests so that I can manage who joins my ride.	• The driver can accept or reject a pending request for their ride. • The system updates the request status after the decision. • The passenger can see the resulting status.
US28	As a passenger, I want to receive confirmation of my booking request so that I know whether my place on the ride has been approved.	• The passenger can view the outcome of their booking request. • The outcome clearly indicates whether the request was accepted or rejected. • The outcome is linked to the correct ride.
US29	As a driver, I want to view my active ride details so that I can keep track of my trip while it is in progress.	• The driver can open details for an active ride. • The page displays key trip information, such as route, departure time, and booking details. • The displayed status reflects the ride's current state.
US30	As a driver, I want to mark a ride as completed so that the trip's status is updated once the journey has ended.	• The driver can mark an eligible active ride as completed. • The ride status updates to completed. • The updated status is visible in the driver's ride list and relevant booking views.
US31	As a logged-in user, I want to log out of my account so that I can securely end my session.	• The user can choose the log-out option. • The session ends and the user is returned to the login page or public page. • Protected account pages require login again.

Admin

ID	User Story	Tasks users should be able to do
US32	As an Admin, I want to log in so that I can access the admin panel.	• The admin can enter valid login details. • Successful login opens the admin panel. • Invalid details display an error and do not grant access.
US33	As an Admin, I want to view the dashboard so that I can monitor the platform.	• After logging in, the admin can open the dashboard. • The dashboard displays the available platform overview information. • The admin can navigate from the dashboard to relevant management sections.
U34	As an Admin, I want to view all users so that I can manage driver and rider accounts.	• The admin can open a list of registered users. • The list identifies each user's account type, such as driver or rider, where available. • The admin can open a user's details from the list.
US35	As an Admin, I want to search for a user so that I can quickly find an account.	• The admin can search using an available identifier, such as a name or email address. • Matching accounts are displayed. • A message is shown when no matching account is found.
US36	As an Admin, I want to view user details so that I can verify account information.	• The admin can select a user and view their stored account details. • The details shown are associated with the selected user. • Only authorised admins can access these details.
US37	As an Admin, I want to view all rides so that I can monitor activity.	• The admin can open a list of ride listings. • Each listing displays available key details, such as route, date/time, driver, and status. • The admin can identify active, completed, or cancelled rides where those statuses are supported.
US38	As an Admin, I want to suspend or reactivate user accounts so that I can keep the platform safe.	• The admin can suspend an active user account. • The admin can reactivate a suspended account. • The account status updates and is visible to the admin after the action.
US39	As an Admin, I want to remove inappropriate ride listings so that the platform remains trustworthy.	• The admin can select a ride listing for removal. • The system asks for confirmation before removing the listing. • After confirmation, the listing is no longer visible as an available ride.
US40	As an Admin, I want to view all bookings so that I can monitor trips.	• The admin can open a list of bookings. • Each booking displays available details such as rider, ride, booking date, and status. • The admin can identify the booking status.
US41	As an Admin, I want to view reports from users so that I can resolve issues.	• The admin can open submitted user reports. • Each report displays its available details and current status. • The admin can open a report to review its contents.
US42	As an Admin, I want to view system statistics so that I can monitor app usage.	• The dashboard or statistics page displays available usage statistics. • The figures are based on recorded platform data. • The admin can identify the reporting period or date range when provided.
US43	As an Admin, I want to send announcements to users so that they receive important updates.	• The admin can enter an announcement message. • The admin can submit or publish the announcement. • The system displays a success or error message after submission.
US44	As an Admin, I want to manage my profile so that my information is up to date.	• The admin can view their profile information. • The admin can edit permitted profile fields. • Valid changes are saved and shown when the profile is viewed again.
US45	As an Admin, I want to change my password so that my account stays secure.	• The admin can submit their current password and a new password, according to the system's process. • The new password is accepted only if it meets the password rules. • The system confirms a successful change or displays an error.
US46	As an Admin, I want to log out so that my account is protected.	• The admin can choose the log-out option. • The session ends and the admin is returned to a login page or public page. • Protected admin pages cannot be accessed again without logging in.
